

Announcing the first annual Canadian Tick-Borne Disease Conference

November 8 & 9, 2025

Vantage Venues 27th Floor

150 King St. W, Toronto, ON

A conference for healthcare practitioners

Join us for the first annual Canadian Tick-Borne Disease Conference exclusively for medical practitioners. Taking place in Toronto, November 8th & 9th this conference will allow you to hear the latest on diagnosis and treatment of Lyme and other tick-borne diseases from fellow practitioners and experts.

As our planet warms and ticks expand their range across Canada, more and more Canadians are at risk of contracting Lyme, Babesiosis and other related diseases and co-infections. These complex illnesses challenge our medical system to more effectively test, diagnose, and treat the patients who suffer from them.

With more than a dozen sessions presented by Canadian practitioners, the CTD Conference will focus on both diagnosis and treatment with a Canadian-specific lens.

For more information on the speakers and conference program and/or to register please visit: www.ctdconference.ca
